

A presentation system for trustworthy telemetry

HTML when presenting, one static page per slide in PDF

Template gallery · 2026

01

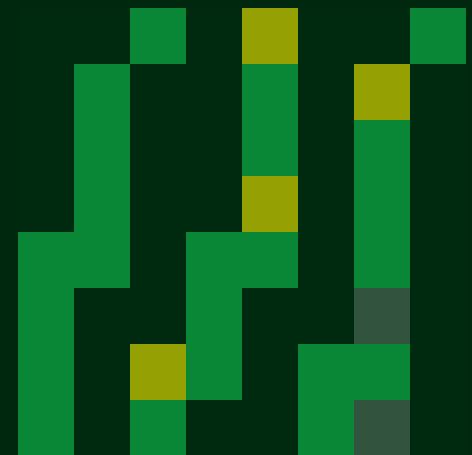

Section divider

A numbered chapter only when the deck has a real sequence.

One idea fills the room.
Everything else gets out of its
way.

■ ■ Concept comparison

Collect

Gather the signals needed to answer a defined question.

Understand

Keep context that explains behavior across service boundaries.

Act

Make the next diagnostic step clear to the operator.

■ ■ A small set of meaningful numbers

85%

Noise removed

After route and severity filters

42

Services checked

Across production namespaces

3

Issues to fix first

Ranked by impact

■ ■ Code with room to read

```
1 processors:
2   filter/drop-health-checks:
3     error_mode: ignore
4     traces:
5       span:
6         - IsMatch(name, "^(GET|HEAD) /healthz$")
7
8 service:
9   pipelines:
10    traces:
11      processors: [filter/drop-health-checks]
```

■ ■ Petal depth without dashboard chrome

Context

A flush region explains what the audience needs to know.

Action

The brighter slab carries the decision or the concrete next step.

Light slides reset attention and keep a long technical deck from feeling monotonous.

■ ■ Five takeaways fit when the hierarchy is clear

01 Start with the operational question.

02 Keep the signal that helps answer it.

03 Show evidence at a readable size.

04 Use motion to explain change.

05 Resolve every animation for print.

Thank you
